LUMIDRIVER LED Electronic drivers

The highly efficient **Lumidriver** range of LED electronic drivers are specially designed to work with our LED luminaires for general lighting solutions such as spot and accent downlights, LED strips, LED panels as well as colour changing lighting solutions.

The Lumidriver range's intelligent and robust design offers excellent reliability thanks to its short circuit, overload and overheat protection.

The range offers both constant current and constant voltage drivers in either non-dimmable or dimmable solutions. They can help lower cost of ownership and ensure quick and easy installation, making it a contractor must-have.

Additionally, the **Lumidriver** range increases energy savings and CO₂ reductions achieved with LED lighting and offers a power factor correction of up to 0.95.
